

Multilingual Query- Reformulation using an RDF-OWL EuroWordNet Representation

Ernesto William De Luca, Martin Eul and Andreas
Nürnberg
Otto-von-Guericke-University of Magdeburg
<http://irgroup.cs.uni-magdeburg.de>

Overview

Support the user in query formulation

- functionalities for browsing
 - multilingual lexical resources
 - and related Web documents

On one hand:

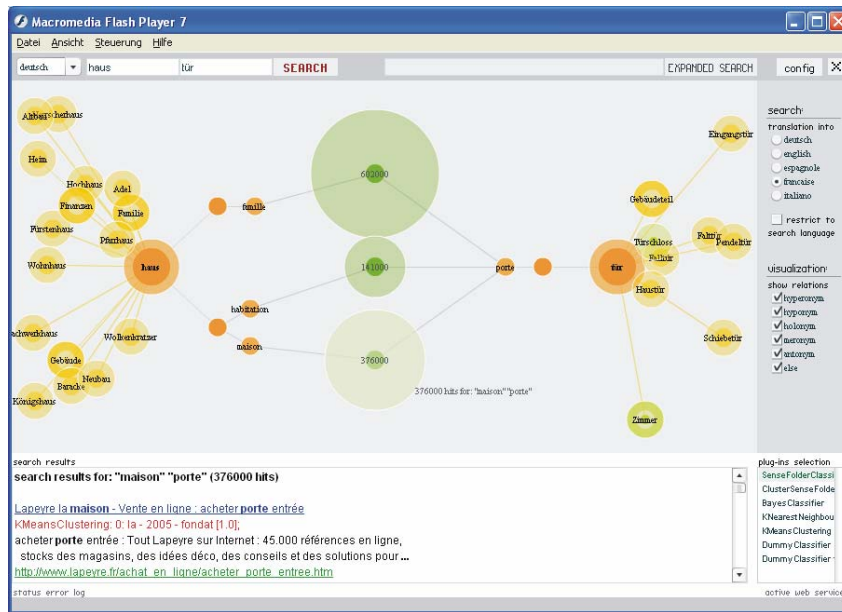

- support the **learner/user**
 - to **find** all possible **word senses**
 - then **retrieve and categorize** documents.

On the other hand:

- help the **author** who works with RDF/OWL
 - for **editing and structuring** word senses

Tools for Query Reformulation

MultiLexExplorer

RDF/OWL LexiRes
